DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 7-10, 13 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Malki (6,044,068).

As to claims 1 and 15, Malki teaches in a CODEC, a silence-improved echo canceller having silence detector and processor, for detecting whether a frame of input samples consist complete silence (silence noise) and processing the frame by setting it's the samples to zero value (Fig.10; Col.10, lines 3-8; Col.6, lines 45-65).

As to claims 7-10 and 13, Malki teaches where the system sets the sample according to the position of the silence in the window, where the window comprises portions (Figs.6, 4-5).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-12 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Malki.

With respect to claims 11-12, Official Notice is taken that CELP coders are old and well known and would be obvious in Malki art for encoding the samples.

Allowable Subject Matter

Claims 16-22 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The claims are allowable because, Malki doesn't teach the encoder adaptively tracking the quantization level of the input signal as recited.

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments see page 2, filed 2/18/2004, supported with the declaration file therewith, have been fully considered and therefore, the rejection by Benyassine has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Malik.
